## PROJECTS

### Project: 1

#### **Name:** Curriculum Connector

**Description:** Designed a comprehensive platform to provide detailed descriptions of various educational courses, including Intermediate (Inter), B-Tech, and Diploma programs. Curated extensive course information within each category, offering users insights into specific courses, including prerequisites, syllabus details, and career prospects. Enhanced user experience by organizing and presenting course data in a structured and easily navigable format, facilitating informed decision-making for students and educators.

**Technologies:** Front end – HTML, CSS, JavaScript

### Project: 2

#### **Name:** Pick'N'Learn – Faculty Selection Platform

**Description:** A Student-centric web application designed to enhance faculty selection through democratic participation. Developed a platform where educators upload short demo videos showcasing their teaching style.

**Technologies:** Java, HTML, CSS, JavaScript, MySQL, JDBC
